SUBJECT: Extension of Term of Validity for Annual Flying Physical (PHA) and Physiologic Training

AFMOA/SGZA and HQ USAF/XOOT jointly released the attached message to address the issue of specific operational requirements for flying personnel.

As a part of this coordinated effort, effective as of 2 Oct 01, all flyers are granted up to a six-month extension to annual flight PHA (to include those with waivers) and to expiration date for current physiologic training. This means that these flyers have up to six months past the end of their birth month and six months past the expiration date of current AF Form 702, Physiologic Training, to accomplish the event(s).

This provisional extension is operationally driven and it is important to understand that flying PHAs, waiver renewals and physiologic training must be accomplished on time, before deployment if possible. This policy provides up to six-month extension for those affected by operational deployments or other operational contingencies. It is not an automatic grace period applied to everyone.

Any waiver requiring every six to twelve month renewal is exempted from this extension.
(If necessary, affected aviators can be considered on a case-by-case basis.)

Please ensure that all unit SGP's receive this notification and distribute it accordingly.

This extension will be valid for the duration of the NCA-declared national emergency and must be reviewed no later than 31 March 2002.

If you have any questions, please do not hesitate to contact my POCs, Col Dan Eldredge, Chief of Physical Standards or Col Albert Hartzell, Chief Physiologist, AFMOA/SGZA, 110 Luke Avenue, Room 405, Bolling AFB, DC 20332-7050, DSN 297-4200.
